Namma Space capture card

One phone. Two videos. About 20 minutes of filming.

1. Choose the space 2 min

- Pick a space with things to look at: shelves, posters, a rug, plants.
- Avoid glass walls, big mirrors, wall-sized windows. A bare meeting room is risky: the camera path may break. Add books, bags and coats first.
- Best: a door into a second space.
- It will be public. Clear papers, photos, screens.

2. Set the room 5 min

- Nobody in shot. Pets out.
- Fans off and stopped. Curtains still.
- Door fully open and wedged.
- All lights on. No sun patches.
- Cover mirrors. Screens off.

3. Set the phone

iPhone

- Settings > Camera > Record Video: **4K, 30 fps**
- **HDR Video: off.** Lock Camera: on.
- Enhanced Stabilization, Action mode, Auto FPS: off.
- Lights flicker on screen? Use 25 fps (turn on Show PAL Formats).
- Camera app: Video, 1×, landscape. Press and hold a mid-bright wall until **AE/AF LOCK** shows.

Android

- **4K, 30 fps**, main 1× lens.
- HDR10+ off. Super Steady and other stabilisation off. Auto FPS off.
- Lock focus and exposure (Pro video).

Setting names vary by phone. Cannot find one? Tell us the model.

- Clean the lens. 5 GB free. Battery above 50%.
- **Film a 30 s test clip.** AirDrop the original file (not WhatsApp). Wait for PASS, WARN or FAIL.

4. Take A: the room 3-4 min, one video

Chest height, landscape, both hands. **Turn your body, not your wrist.** One step per second. A full circle takes at least 12 s.

1. Stand in the doorway facing in. Hold still 3 s.
2. **Outer loop:** walk along the walls, 0.5 m away, camera across the room.
3. **Inner loop:** 1.5 m from the walls, camera at the nearest wall, tilted slightly down so the floor line shows. At each corner tilt up to the ceiling corner for 2 s.
4. **Low pass:** phone at waist height, tilted 30° down. Circle the table and big furniture.
5. Finish where you started.

5. Take B: room plus next space 4-5 min, a separate video

1. Repeat take A's outer loop.
2. Walk slowly out through the door. Keep both sides in view for 3 s.
3. Outer and inner loops in the next space.
4. Come back through the same door, slowly. End inside the room.

Never: spin on the spot. Zoom. Switch lens. Film a bare wall from under 1 m. Walk fast. Let anyone into the shot.

6. After 3 min

- Photo of your hand sketch: outline, door, windows, big furniture, start point.
- Your height in cm.
- Optional: room length and width at floor level, door width. Note how you measured.
- Send original files by AirDrop or cable.

Namma Space SOP v1, 30 Oct 2026. The reasons for each rule are in SOP.md.
